

Using Miro for Mind-Mapping

MIRO for Mind-Mapping

Miro is a visual workspace for innovation, designed for organization and structuring concepts.

Mind maps can be used to visually organize and structure information, brainstorming ideas, organizing thoughts for writing, and structuring a complex topics.

1

Getting started

Sign up to create a Miro account. It's free to use!

This application is browser-based which means that it runs on your web browser and you don't need to download it.

2

Choose a template

There are many Mind Map templates to choose from or you can create one from scratch.

TIP: Using a template gets you started a bit faster.

3

Start with a central idea

Determine the main purpose of your mind map and type it in the center node.

All of your subtopics will be related to this concept.

4

Branching out

Then using the tools, you click the + sign to add 4-5 more branches out from the center. Then type in your node with the text tool, outlining the most basic subtopics that connect to the main concept.

5

Add more nodes

From these subtopics, further explore topics by adding more nodes that relate to the subtopics.

Draw lines connecting each idea idea to its supporting details.

6

TIPS

Drag and drop images in your diagram from your file manager. Scale them larger, crop them, and move them around on your board.

Changing colours, fonts, and shapes for better organization.
